What Is BlackDiamondSCInc1 (BDSCI1)?

BlackDiamondSCInc1 Token, Wallet & Trading Platform looks to provide a comprehensive DeFi product for both advance-users and those new to the world of decentralized trading, with a web3 feature-packed non-custodial wallet; multi-chain native token swapping, synthetic asset trading and the ability to invest in multi-chain savings accounts are just some of the functionalities on offer, with a non-custodial design meaning that users are always in control of their funds.. True meaning of decentralization!

What Is A Token Sale?

Token sales are a crowdfunding tool used to build capital by startups or in order to launch a new project. In a token sale, a certain amount of new cryptocurrency created by the organizers is acquired by investors in exchange for other cryptocurrencies (e.g. Avalanche, USDC). Token sales can be also called IDOs (initial decentralized coin offerings).

What Is BDSCI1 Token?

BlackDiamondSCInc1 (BDSCI1) is a token based on the EVM standard and Avalanche blockchain. Thus, this token is guaranteed to work properly in the ecosystem. It can be used in other decentralized programs without any problems. EVM standard ensures the token meets the security requirements that are common in the industry.
